Filled weight of appliance (kg)	281	282	347	349

\*The COP was measured under test conditions with an ambient air temperature of 20°C/15°C (Dry Bulb/Wet Bulb) and water heating from 15°C to 55°C during operation of the water heater.

\*The noise level was measured at 1 m from the water heater during a noise test carried out in accordance with standard GB/T 23137 in a hemi-anechoic chamber in a laboratory.

Subject to technical or design modifications. Valid for mainland France only. The general terms and conditions of sale, warranty and service are available on [warmeo.com](http://warmeo.com)
